

## INTRODUCTION

In the JPI Oceans Joint Action Science for Good Environmental Status (S4GES), a complementary approach towards GES is being designed to assess marine environmental health in a more holistic fashion. It relies on a sampling approach that targets the actual processes within the system, based on near real-time observations of deviations or events in the system. The core idea and primary goal of S4GES is to support the implementation of MSFD with a complementary approach that increases the efficiency and effectiveness of the observation strategies. S4GES aims to lay the foundations for such a paradigm shift by piloting the approach in different settings in European waters.

S4GES began to test this approach in a proof-of-concept sampling campaign aboard RV Belgica in the summer of 2022, for the tide-driven system in front of the Belgium and Dutch coast. During the last workshop in Brussels (February 2024), it was agreed that further validation of the «process-based» approach tested in the Belgian part of the North Sea is needed in other marine ecosystems. The goal is to provide further "proofs of concept" to propose a fit-for-purpose revision of the national observation strategies for MSFD.

## Meeting goal

The meeting in Athens (26-27 June) intends to further mobilise the scientific community and key policy stakeholders towards the S4GES-initiated methodology, fostering dialogue on the scientific and financial efforts to tackle the challenge of GES.

## **AGENDA**

First day: The scientific and financial efforts to tackle the challenge of GES Chair: Kalliopi Pagkou, HCMR, Greece

Welcome & registration	15:00-15:15
The scientific efforts in assessing the marine environment Ángel Borja, AZTI-Tecnalia, Spain	15:15-15:45
The financial efforts in assessing the marine environment Christina Zeri, HCMR, Greece	15:45-16:10
Coffee break	16:10-16:30
The JPI Oceans S4GES action: main scientific results and future strategy Patrick Roose, RBINS, Belgium	16:30-17:00
Discussion	17:00-18:00

## Second day: The opportunities for funding and spending review of MSFD Chair: Aris Karageorgis, HCMR, Greece

The identification of process-based observation in EU Federico Falcini, CNR, Italy	09:30-09:50
A review of available infrastructures for S4GES observation Joaquín Tintoré, CSIC, Spain	09:50-10:15
The JPI Oceans second phase of S4GES Thorsten Kiefer, JPI Oceans	10:15-10:35
Coffee break	10:35-11:00
The vision of EC and opportunities of funding EC representative (TBC)	11:00-11:25
The MSFD Competent Authority needs Erika Magaletti, ISPRA, Italy	11:25-11:50
Panel discussion with the responsible authorities for MSFD and regional conventions	11:50-12:50
Next steps	12:50-13:00
Light lunch	13:00

Rue du Trône 4 | 1000 Brussels | Belgium Tel. +32 (0)2 62616 60 | info@jpi-oceans.eu www.jpi-oceans.eu
